Education

Bipin Tripathi Kumaon Institute of Technology Expected June 2026
Bachelor of Technology in Computer Science and Engineering *Dwarahat, Uttarakhand*

- **Relevant Coursework:** Data Structures and Algorithms (C++), Operating System, Database Management System, Object-Oriented Programming, Machine Learning

Experience

Laika AI Mar 2025 – Present
Full Stack Engineer *Remote*

- Built a backend pipeline that processes uploaded videos and extracts the most engaging segments for automated Instagram content, reducing manual editing time by 60%.
- Designed an event-driven notification pipeline that processes blockchain events (via QuickNode webhooks) and asynchronously dispatches push notifications using Firebase Cloud Messaging (FCM).

Tercera Ventures PVT LTD Nov 2024 – Jan 2025
Backend Developer Intern *Remote*

- Refactored and optimized 15+ Node.js REST APIs and architected normalized PostgreSQL schemas, reducing average response time by 35% through efficient query restructuring, indexing, and execution plan analysis under concurrent workloads.

Indian Institute of Technology Roorkee Jan 2024 – Mar 2024
Software Engineer Intern *Remote*

- Developed and optimized a web-based COA experiment platform to simulate core architectural concepts and optimizing rendering and restructuring backend computation to reduce unnecessary processing

Indian Institute of Technology Roorkee July 2023 – Aug 2023
Software Engineer Intern *Roorkee, Uttarakhand*

- Built a web-based virtual laboratory for the MPTT using Python, Streamlit, NumPy, and Plotly, enabling students to perform experiments through an interactive simulation environment.
- Developed interactive visualizations and real-time graphs using Plotly to help users analyze relationships between load resistance, power transfer, and circuit performance.

Projects

TeamGPT | *Next.js, TypeScript, LangChain, Pinecone, Gemini API, PostgreSQL, Liveblocks*

- Built a multi-agent RAG-based SaaS platform that dynamically routes queries between vector search (Pinecone) and live web search, returning structured, citation-backed responses with context-aware reasoning.
- Designed an orchestration layer to intelligently select tools based on query intent, enabling modular AI agent execution workflows.
- Architected secure multi-tenant backend using Clerk authentication and isolated PostgreSQL schemas to ensure data separation.

HealthCare+ | *Next.js, Prisma, PostgreSQL, NextAuth (JWT), Razorpay*

- Developed a full-stack hospital management system with role-based access control for Admin, Doctors, Staff, and Patients.
- Integrated Razorpay payment gateway and implemented AI-powered chatbot to assist patients with preliminary consultations.

Technical Skills

Languages: Python, JavaScript, TypeScript, C/C++, SQL
Backend: Node.js, Express.js, REST APIs, WebSockets
Frontend: React.js, Next.js, Tailwind CSS, Shadcn UI
Data Analytics: NumPy, Pandas, Matplotlib, Plotly, Streamlit, Data Visualization
Databases: PostgreSQL, MySQL, MongoDB, Prisma ORM, Redis, SQL
AI/GenAI: LangChain, Pinecone, Gemini API, RAG Architecture
Tools: Docker, Git, GitHub, Linux, Postman, CI/CD
